Build Basics for HuskyCT site
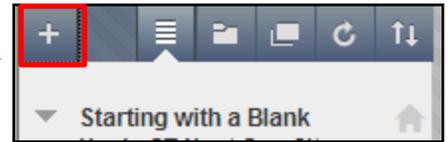

Instructors need to build the navigation menu in their HuskyCT site to create "Content Areas" where files and activities such as Assignments or Tests can be posted and to add student access to Tools such as the Discussion Board.

"Edit Mode" must be turned on . This button is found at the upper right of your screen when inside a course site where you are instructor.
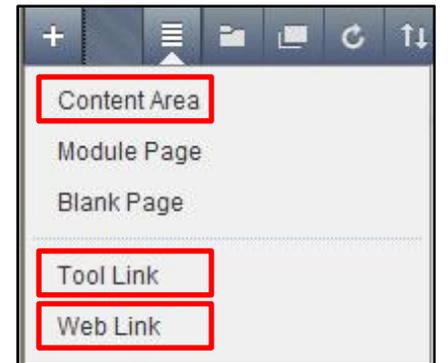

Edit Mode is: ● ON

Adding links to the navigation menu

Click on the **"+" icon** at the upper left-hand corner of the navigation menu

Choose the type of link you want to add.

The most commonly used options are outlined.

Content Area
Module Page
Blank Page
Tool Link
Web Link

Name link , check box to make available, click Submit

Add Content Area
✳ Name: [   ]
☐ Available to Users
Cancel   Submit

Add Tool Link
✳ Name: [   ]
Type: Access WebAssign ▼
☐ Available to Users

Organizing the navigation menu

The navigation menu should reflect the design of your course and take students quickly to the content and activities provided. The possible variations are endless. Here is just one example.

Tool link → Announcements
Content Area → Course Overview and Syllabus
Content Area → Weekly Modules
Tool link → Discussion Board
Content Area → Assignment Submissions
Tool link → My Grades

This Content Area will have an "Item" header, the syllabus file, and a file with the class schedule

This Content Area will have a Content Folder for each week of the semester

This Content Area will have Assignments posted where students will submit their work
